

Bricks 4 Kidz

After School Robotics

Starting Monday September 25th for 8 weeks

3-4pm for grades k-5

Mission to space Robotics

Many children dream of being an astronaut and traveling to space, so Bricks 4 Kidz created an entire unit around space! Each week, students will learn about real-life space exploration and build a new model related to the NASA space program. Models include a satellite, a lunar module, a centrifuge which astronauts use to prepare for the physical sensations of launch, a treadmill which astronauts use to stay fit in space, and a "space robot". During this unit, students will learn some of the science behind launching things into orbit, will hear about the most-distant man-made object in the universe, and discuss what it is like to be an astronaut in space. Are you a budding astronaut? An adventurer who loves space exploration? Then you'll love our Space theme projects. We'll be building NASA astronaut training equipment, a space robot and more in this exciting eight week session. Let Bricks 4 Kidz launch your imagination to outer-space and beyond!

Cost is \$105 including tax for 8 classes

Cost includes custom minifigure
